Response H

In the claims:

All of the claims standing for Examination in the above-referenced case are reproduced below. Claims 2, 10 and 13 are herein amended in the present response.

sub-61)

2. (Amended) A method for routing Internet Protocol Network Telephony (IPNT) calls at customer premises having a managing processor and a plurality of agent stations coupled to the managing processor, each agent station comprising a computer digitally connected to a telephone forming an IPNT-capable workstation, the managing processor storing a current set of routing rules specific to and accessible and editable by a person assigned to the computer workstation, the method comprising steps of:
